

Committee Votes To Upgrade Curriculum

The following goals were voted by the School Committee at their September meeting. The goal to upgrade the curriculum will be limited to high school English, Grades 7-12.

In addition, the superintendent, principals and/or appointees will work on a coordinated curriculum with special emphasis in the elementary schools in reading and listening skills.

The School Committee will request two soccer fields or two all-purpose fields be made available from the school facilities committee, and that the School Committee will furnish the justification for the fields to the school facilities committee.

The superintendent has been directed to initiate a cost-awareness program for every employee in the school system — not just for books, paper and equipment. The program is to be devised so that every person will be aware of "the little things"

that add up to a considerable sum: phone calls, etc.

The superintendent will prepare for the administrator's unit negotiations by developing a management plan for delegating responsibilities.

In addition, the business manager will set up standard procedures and regulations for the accounting of all student activity funds by students and all class faculty advisors. Committee members felt this

would be a good opportunity to teach students the proper methods of the business world.

The business manager will be the coordinator of a program to use the math department

computer to do the work needed by the Cohasset School system for budgeting, purchasing, scheduling and the program will be coordinated with the assistance of the town accountant.
